**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuniyasu et al (GB 1369047).

Kuniyasu discloses a process for purifying waste gas mostly containing carbon monoxide by contacting the waste gas including carbon monoxide with a mixture of catalysts consisting of manganese sesquioxide supported on lanthanum oxide having a particle size of less than 200 mesh. This process inherently teaches the removal of carbonyl metal contained in the waste gas from carbon monoxide (see example 4).

2. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
